-9

Number	Description	Basic color
7	Voltage D.C. supplied at all times (sensor)	YE
8	Sensor signal	WH
9	Sensor signal return (reference/ ground)	BN
14	Voltage supplied in Start and Run (overload protected)	VT
15	Voltage, ignition switch in Start or Run (not overload protected)	GN
29	Voltage supplied at all times (overload protected)	OG

Number	Description	Basic color
30	Voltage supplied at all times (not overload protected)	RD
31	Ground	BK
49	Pulsed power feed (overload protected)	BU
50	Voltage, ignition switch in Start (not overload protected)	GY
59	AC Power	GY
63	Variable D.C. voltage (overload protected)	WH
