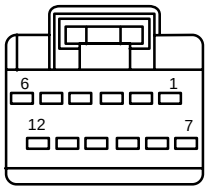
C3071b

14A005

A187
Module, power sliding door, RH side



F12077

Pin	Circuit	Circuit function
1	1231 (RD/WH)	Battery voltage, to, Module, power sliding door, RH side, and, Module, power sliding door, LH side
2	1237 (LG/RD)	Module, power sliding door, RH side, to, Overhead console
3	1238 (TN/LB)	Module, power sliding door, LH side, to, Power sliding door switch, left
4	1430 (TN/RD)	Rear Electronic Module (REM), to, Module, power sliding door, RH side, Remote control unit
5	1227 (WH)	Detent switch, RH, to, Module, power sliding door, RH side
6	1236 (VT/WH)	Module, power sliding door, LH side, to, Overhead console
7	1434 (LB/PK)	Module, power sliding door, LH side, to, Rear Electronic Module (REM), wake up, signal
8	1431 (PK/BK	Rear Electronic Module (REM), to, Module, power sliding door, RH side, and, Module, power sliding door, LH side
9	–	not used
10	70 (LB/WH)	ISO Bus
11	1040 (RD/BK)	Voltage in Run (overload protected)
12	–	not used

C3071c
