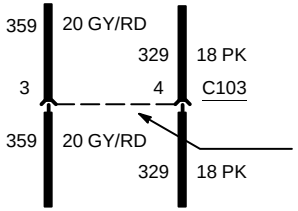
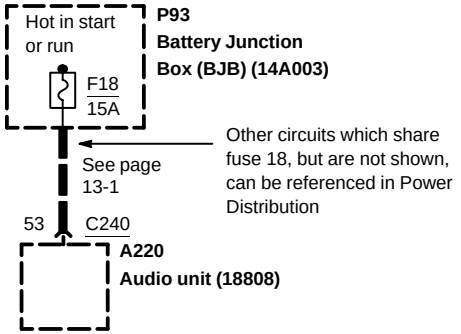
A thick dashed line represents 2 or more wires

A thin dashed line represents a continuation

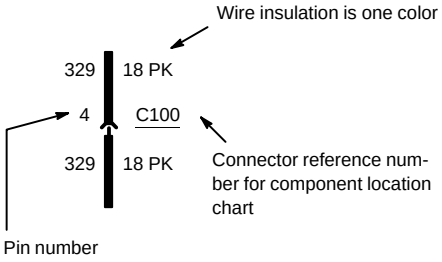


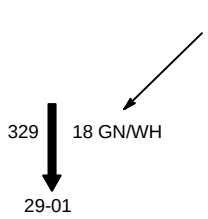
Two connections (pins) in the same connector

Dashed line indicates terminals for the same connector



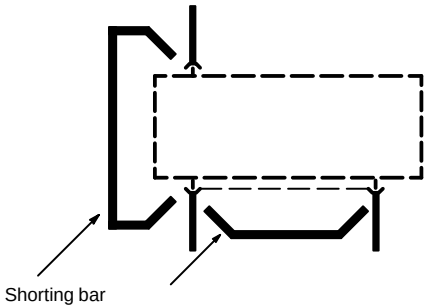
Other circuits which share fuse 18, but are not shown, can be referenced in Power Distribution

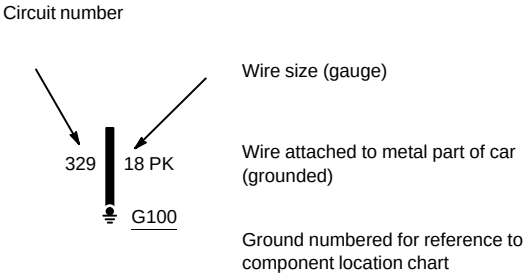


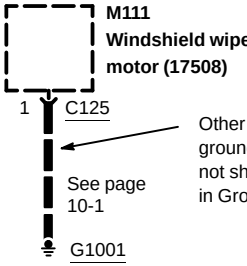


Wire insulation is one color with another color stripe (green with white)

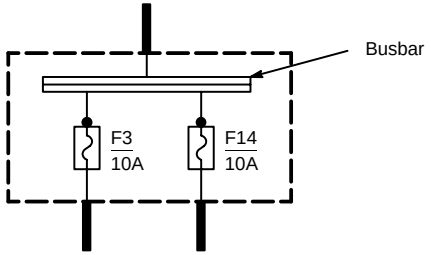
Circuit references a wire which connects to another circuit

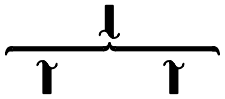




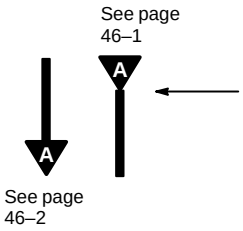


Other circuits which are also grounded at G1001, but are not shown, can be referenced in Grounds





A choice bracket shows wiring differences between models, countries or options



Cut wires referenced between pages. Arrows show current flow from power to ground.
